For additional info on a calendar events, check club web site.

Greeting fellow carvers,

With the carving you are working on, or just started, or even finished, where will it take you or will it inspire you to take you in a new direction (aka) Woodturning??

There are many turners with few carved turnings to show, but really do these get the respect of being shown publicly! With that in mind, let's not squirrel away what you have carved on your turnings. Be proud to show them! I have seen beautifully carved turnings! A Carved turning is Art. Art is an expression to be proud of.

What you create inspires others and you will even inspire yourself to do more! Carving is Art, Sculpture is a statement or Expression that has inspired you to create or produce your idea or vision!

Remember.....Safety first, sharp tools, clean cuts and.....Happy Carving!!

Your prez, Leo
